

India Heritage Walks

India Heritage Walks is a web platform by Sahapedia that hosts immersive and diverse events that bring people closer to their local heritage and culture. Through this platform, discover a multitude of walks, talks and other events in your city. Our aim is to make the heritage engagement programmes that are currently being carried out through walks and talks, more holistic and inclusive.

Through India Heritage Walks, users can attend our weekly immersive activities, request previous events, co-host or partner with us to create outreach programmes, or host walks with us individually. Users can also enjoy our regular updates on the IHW Blog.
